

Huge event, right-sized guide to help

When attending a show as large as IMTS 2018 – The International Manufacturing Technology Show, you want to maximize those miles you’ll be walking by planning what booths and events to visit. You want to find exhibitors offering equipment, technology, and insight for the precision markets you serve, and that’s where *GIE Media’s Quick Guide IMTS 2018* becomes the go-to source.

This is the 32nd edition of IMTS, so even if this isn’t your first go-around attending the show, each year it gets larger and offers more to see. With more than 2,400 exhibitors displaying their solutions across 1.3 million net square feet of show floor, you need a plan. First, know the pavilions:

- Abrasive Machining/Sawing/Finishing – North Building, B Hall
- Additive Manufacturing – North Building, B Hall
- Controls & CAD-CAM – East Building
- EDM – East Building
- Fabricating & Lasers – North Building, B Hall
- Gear Generation – North Building, B Hall
- Machine Components/Cleaning/Environmental – North Building, C Hall
- Metal Cutting – South Building
- Quality Assurance – East Building
- Tooling & Workholding Systems – West Building

As you turn the pages of *GIE Media’s Quick Guide IMTS 2018* you will find key industry-focused exhibitor listings for medical, aerospace, motor vehicle, and power generation, and a complete alphabetical listing, helping you find solution providers in the markets you serve.

After you have mapped out your booth visits, remember to save time to attend the educational conferences offered during the show. Pages 14-26 feature topics and presenters at The IMTS Conference and the 2018 Integrated Industries Conference – part of Hannover Messe USA, the newly branded North American industrial technology co-located trade show.

Now that you are armed with the *GIE Media’s Quick Guide IMTS 2018*, make sure to add booth #236900 – Today’s Technology Center – to your list. Stop by, say hello to the staff, and see the end results of precision manufacturing.

Booth numbering at IMTS 2018

Company booth numbers for IMTS 2018 have a new look – 6 digits instead of 4 – so here’s a legend to help you navigate the show.

Building	Bldg. ID	Level	Booth #
East	1	2	1000 - 2099
East	1	3	3000 - 5999
North	2	1	0100 - 0999
North	2	3	6000 - 7999
South	3	3	8000 - 9999
West	4	3	1000 – 2999

So, booth #236900 means North Hall, third floor, booth #6900.
