

GLACIER

Sorting robots purpose-built to last in MRFs

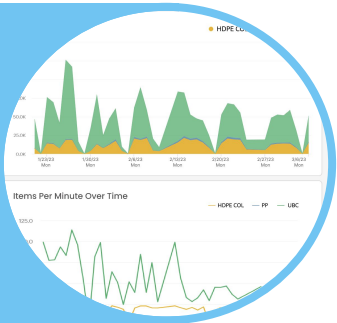

partnerships@endwaste.io

Glacier has a track record of successful, scaled partnerships with innovative MRFs across the industry

Our customers and partners include:

Measure product recyclability and recover recycled material at the highest ROI with Glacier

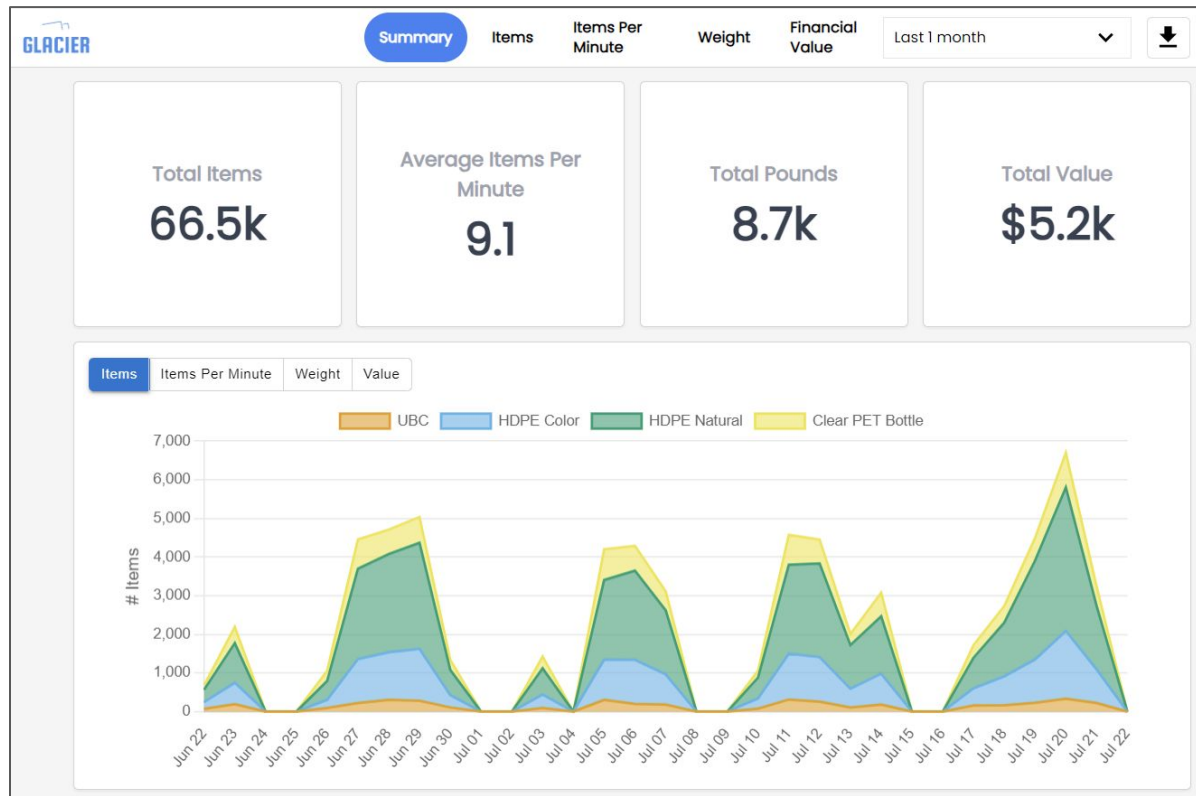

Real-time AI monitoring

delivers item-level data on residue leakage, contamination rates, and anything that needs your attention

Low-cost sorting automation
recovers more feedstock at low cost without compromising on performance

Glacier's insights dashboard allows users to interact with their data in real time

AI dashboard features include

- **Automated reports** that deliver the most relevant metrics at the right cadence, based on your feedback
- **Real-time item tracking** for commodities
- Analysis by **item count, weight, and value**
- Export as **.csv**

Glacier's AI algorithm can already identify over 90% of typical curbside commodities

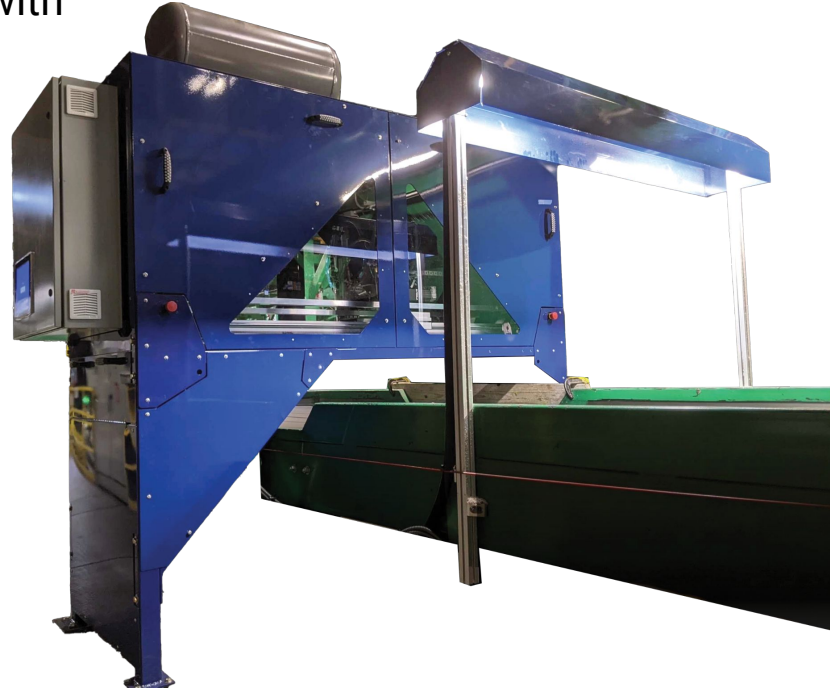

We can identify:

- **PET**
 - Clear
 - Green
 - Dark
 - Thermoform
- **HDPE**
 - Color
 - Natural
- **LDPE**
- **Fiber**
 - OCC
 - Newsprint
 - Office paper
- **Aluminum**
 - UBCs
 - Foil
- **Glass**
 - Clear
 - Green
 - Amber
- **Ferrous metals**
- **Gable-top cartons**
- **Aseptics**

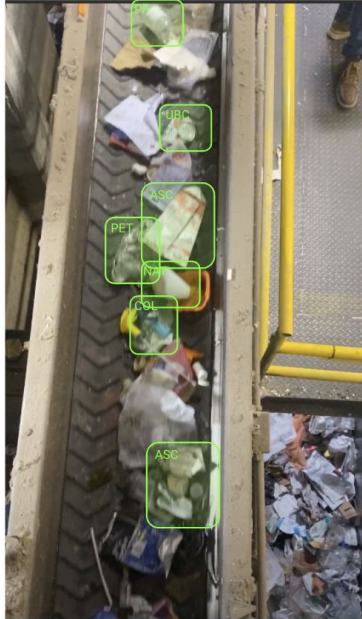

...and anything else you need

Experience Glacier's custom-built experience

- Innovative, compact design for **easy installation** with minimal retrofits
- **45 successful picks per minute** in real MRFs - not a lab
- Pays back in as little as **6 months**
- **Maximum** uptime
- **Low** maintenance
- Dedicated hotline for **around-the-clock support**
- **Priority SLAs** for rapid and reliable issue resolution
